

## She's Not A Saint

BlutEngel

I remember the day when I met you  
I felt so lonely and confused  
You took me by the hand and promised me  
To heal my wounds, to show me a better place

I tried to trust you  
And you took control of me  
I tried to love you  
And you put your spell on me

She's not a saint  
And she takes whatever she wants  
She's not a saint  
And she needs your flesh tonight  
I try to run, I try to hide  
I try to escape this life for blood and tears  
I try to run, I try to hide  
I try to escape this hunt for lust and pain tonight

You set my world on fire, you tortured my soul  
You started to dominate my life  
And I only can surrender to your black soul  
I will worship you forever more

I tried to trust you  
And you took control of me  
I tried to love you  
And you put your spell on me

She's not a saint  
And she takes whatever she wants  
She's not a saint  
And she needs your flesh tonight  
I try to run, I try to hide  
I try to escape this life for blood and tears  
I try to run, I try to hide  
I try to escape this hunt for lust and pain tonight
