

We Fall

BlutEngel

"You and me against the world"
That's what we said when we were young
When we were young

We were living on the edge
We never hesitated
We struggled to survive, to survive

Through all the years we kept on playing
The game of love and hate
The game of love and hate

But then the dark clouds came
And the black rain fell on our broken souls
Our broken souls

Feels like a bullet in my head
Feels like a blade inside my heart
It feels like acid in my veins
Feels like my soul falls apart

And we fall
No one will protect us
No one will be there when we collide
And we fall
Through the memories of our past
We don't want to see our empire die
And we fall
No one will protect us
No one will be there when we collide
And we fall
Through the memories of our past
We don't want to see our empire die

"You and me against the world"
That's what we said when we were young
When we were young

We were living on the edge
We never hesitated
We struggled to survive, to survive

And we fall
No one will protect us
No one will be there when we collide
And we fall
Through the memories of our past
We don't want to see our empire die

And we fall
No one will protect us
No one will be there when we collide
And we fall
Through the memories of our past
We don't want to see our empire die
And we fall
No one will protect us

No one will be there when we collide
And we fall
Through the memories of our past
We don't want to see our empire die
