

cold

Blxckie

Oh, she gon pull up on me
Even though she knows I got a couple waiting in line that are just like her
I remember when she asked me if I got a couple girls on the side and I lied
I said they ain't like her
But I know she know that my heart cold, colder than the winter is
She know that my heart coal, darker than the darkest night
So much so that I know she can sleep at night
Thinking how many times, must she go through this, through
But I know she know that my heart cold, colder than the winter is
She know that my heart coal, darker than the darkest night
So much so that I know she can sleep at night, thinking...

How the hell this nigga play me?
How the hell this nigga say all these things to me
When I went through all his likes, and his comments
Always got his phone on flight, busy dodging
I said girl I'm sorry I was mobbing with the guys
She say what that mean oh wont you stop it with the lies
I said I ain't lying its the truth but in disguise
And baby girl, you look so good I like the sparkle in your eyes

Can't believe that we came so far
Baby we go so hard
Look at your dress and all
Look like a shining star
I know you're proud of me
I turned to a superstar
And you don't gotta change for me I'm cool with just who you are

Oh, she gon pull up on me
Even though she knows I got a couple waiting in line that are just like her
I remember when she asked me if I got a couple girls on the side and I lied
I said they ain't like her
But I know she know that my heart cold, colder than the winter is
She know that my heart coal, darker than the darkest night
So much so that I know she can sleep at night
Thinking how many times, must she go through this, through
But I know she know that my heart cold, colder than the winter is
She know that my heart coal, darker than the darkest night
So much so that I know she can sleep at night, thinking...

I should've listened to my cousin
He knows him better than I do
I swear they went to the same school and shit
Probably fucking all the same hoes, wear the same clothes
Messing it up at all the shows, know how it goes

I'm like "who the hell your cousin?"
Don't even know that nigga, he just a fan to me
And you don't even call no more
Don't even check on me
I know I broke your heart
Come let me mend it please

Girl you know I got these bandages
I got the remedy, I got the sauce on me
I got the recipe

And it's probably why you'll never ever leave me
If you find someone just tell em they ain't built like me

Oh, she gon pull up on me

Even though she knows I got a couple waiting in line that are just like her
I remember when she asked me if I got a couple girls on the side and I lied
I said they ain't like her

But I know she know that my heart cold, colder than the winter is

She know that my heart coal, darker than the darkest night

So much so that I know she can sleep at night

Thinking how many times, must she go through this, through

But I know she know that my heart cold, colder than the winter is

She know that my heart coal, darker than the darkest night

So much so that I know she can sleep at night, thinking...
