Shorty told me I'm heaven sent
Shorty said I'm magnificent
Look if we really being honest, look what the table did
Backflip, backflip it landed on its head

Bucket list looking crazy most of it checked off
Couple girls from my past I'm tryna cover score
Yes I'm really resilient made it through it all
Bank account looking brilliant it all paid off

Make my mamma proud let the word know my name
I done seen it all crumble down 'cause of fame
You just keep my name in your mouth that's a shame
I'm really a boss, I went up, clocked the game

I'm really greatest I can feel it in my veins
Big bro said I got it now I'm tryna just sustain
I'm really soldier, all my gear full of stains
Thankful to the lord that he got me through the pain

Peace love and money that is what we all need
You don't gotta worry baby girl it's on me
If we at a cliff and I say let's jump on 3
Will you go down with me or am I just lonely

I know you my slime you my homie
When I'm at my lowest you gon' hold me down
I said I didn't need you I was joking
I'll need you in my corner when those tears fall down

I'll need you in my corner when that cheque don't bounce
I'll need you in my corner when my knees hit the ground
I'll need you in my corner when I'm down for the count
I'll do the same for you, and that's on God, man I promise

Vision crystal clear it gon' shine just like diamonds
Me and all my bros know the code and assignment
Nowadays I chill watch the money keep piling
Nowadays I chill watch my mamma keep smiling
