

Never Was Wrong

Blxst

You said you fed up, I see
Sit down just level with me
I must do better
Show you good love like you never received
Time and time you try to leave but you just can't leave it alone
You think about the good vibes we was up on
And we get right back like I never was wrong, whoa

Aye
Girl, you said we forever but now it's whatever (Sheee)
Back-to-back with the extras, can't last through the pressure
Yeah
Never said it would be perfect, all I asked for was effort
Understand I prolly ran out of chances
But all my good outweigh the bad, you should measure up

I got too much pride
Love me or hate me, got to choose one side
Don't want nobody else, it's you plus I
Couldn't be no other way, I'd lose my mind
I check myself when I be rude sometimes
Might get to trippin' like my shoes untied
I'm only finished, that's if you done trying
But name a second that I wasn't front line
You can't think one time, no way

You said you fed up, I see (Yeah)
Sit down just level with me
I must do better
Show you good love like you never received (Better)
Time and time you try to leave but you just can't leave it alone
You think about the good vibes we was up on
And we get right back like I never was wrong, whoa

And you know we go way back
Timeless bonds we built, we can't erase that
I know I been in the field but I come straight back
You know I'm one of the realest, can't replace that
Think I be running from love, gotta embrace that
I mention all of the things that I can't take back
Yeah, 'cause I don't like to bow down
And you know that but I'm throwing in my towel now
Said I'm down, down for ya

I got too much pride
Love me or hate me, got to choose one side
Don't want nobody else it's you plus I
Couldn't be no other way, I'd lose my mind
I check myself when I be rude sometimes
Might get to trippin' like my shoes untied
I'm only finished, that's if you done trying
But name a second that I wasn't front line
You can't think one time, no way

You said you fed up, I see (Yeah)
Sit down just level with me
I must do better

Show you good love like you never received (Better)
Time and time you try to leave but you just can't leave it alone
You think about the good vibes we was up on
And we get right back like I never was wrong, whoa
