

# Distance

BoA

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
The winter when we fell in love

I know it wasn't our time  
We had to go our separate ways  
You don't know that silently I  
Was crying out for you to stay

The years come and go but I'm still alone  
My tears like snowflakes falling without a sound  
I wish I was with you now

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
Catching us in the snow

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
The winter when we fell in love

Your name frozen on my lips  
Icesicles pierce in my heart  
Now I wait and send out my wish  
To find out wherever you are

The years come and go, but I'm still alone  
My tears like snowflakes falling without a sound  
I wish I was with you now

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
Catching us in the snow

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
The winter when we fell in love

There's nothing more than I would want  
Than to feel the warm embrace of your love  
But I have faith in the promise that you've made  
And in the frosted window I,  
I'll see your trace

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met  
Catching us in the snow

When it snows outside on this winter night  
I'm looking for a trace of you  
I'll never forget the time that we've met

The winter when we fell in love
