Underneath a setting sun
Something wicked your way comes
Who am I? Just a dream
Sent to take you, shake you, make you scream

Try to see - there - behind my eyes

Be in me - ah - you're hypnotized

Such a moon - rare - we shouldn't waste

Very soon - ah - I'll have a taste

Should I let you awaken? I can't resist! Look around you You're forsaken

You scream
But there's nobody to hear
It doesn't matter
It's only you and me and all of your fears
So scream
A Halloween serenade
Illusions shattered
Wait 'till you're really afraid
You're gonna - ah - ah!

Run and hide - please - from my embrace In the night - ah - I love a chase Tell me no - tease - before we kiss Nice and slow - ah - I live for this

Should I let you remember? I can't resist! Gonna haunt you forever

You scream
But there's nobody to hear
It doesn't matter
It's only you and me and all of your fears
So scream
A Halloween serenade
Illusions shattered
Wait 'till you're really afraid
You're gonna - ah - ah!

Underneath the setting sun Something wicked your way comes Who am I? Just a dream Sent to take you, shake you, make you scream

Try to see - deep - behind my eyes

Destiny - ah - won't be denied

Don't you know - sweet - you're what I need

Flesh and bone - ah - you're gonna bleed

Should I let you awaken? I can't resist! Look around you
