

# Seafarer

bôa

I make a maiden voyage  
Carry all your weight around  
This is not my preferred baggage  
Find a place to set it down

You go your own way honey  
See you later  
You go your own way darling  
I say goodbye now  
You go your own way precious  
Take it easy  
You go your own way baby  
I never knew you

All the fire that used to flame  
No more stars up in my sky  
I'm sailing further than I meant to go  
The waves will wash away the lies

You go your own way honey  
See you later  
You go your own way darling  
I say goodbye now  
You go your own way precious  
Take it easy  
You go your own way baby  
I never knew you

Soon the sky will turn to darkness  
No more solace in my hands  
I'll turn it into something better  
I'll always have another plan

You go your own way honey  
See you later  
You go your own way darling  
I say goodbye now  
You go your own way precious  
Take it easy  
You go your own way baby  
I never knew you
