Little Star

Bob Welch

Now I don't care if I get burned Loving you is what comes first Although you've heard a thousand lies Please believe me for tonight

Do you know you're magic Yeah, you little star Walkin' through the world Breakin' peoples heart Do you know you're magic Yeah, you little star Well, shine on, shine on

Back and forth across my heart
I won't forget you, little star
Little star

I don't care if I get burned Loving you is what comes first I don't care if I get burned Loving you

Although you've heard it a hundred times Believe me, darling, so have I But now lets live just for tonight And let tomorrow take ist time

Back and forth across my heart
I won't forget you, little star
Little star

Back and forth across my heart
I won't forget you, little star
Little star
