

Off With Your Head

Bobaflex

How many pics of your face do you need to take?
Everything that you say drives me insane
All you do is complain, and your friends are all fake
And you're rotting your brain with the pills that you take

It's the end of our story
You're so fucking boring
And this whole time I'm thinking

Off with your head
Off with your head
Now that you're dead
On to the next

You're the biggest mistake that I've ever made
And your heart's gonna break but I feel no shame
I'm so sick of this place, so sick of your face
Didn't want you to stay but you won't go away

It's the end of our story
You're so fucking boring
And this whole time I'm thinking

Off with your head
Off with your head
Now that you're dead
On to the next
You're losing your head now
Losing your head now
Off with your head
Off with your head

Do you wanna see my battle scars
You can never be a match for me
Calling out to all my battle scars
They will find another queen for me

It's the end of our story
You're so fucking boring
And this whole time I'm thinking

Off with your head
Off with your head
Now that you're dead
On to the next
