

Someone To Talk To

Bobby Bare

Now my mind has been wandering, been sailing so high.
Past the smoke blackened buildings, and the smoke blackened sky
.
And the things I've been seeing, Lord, they've got me so scared
.
And I call out "Won't somebody please stop and listen!", but no
body cares.

And I've gotta find someone to talk to,
I've gotta find a safe place to stay.
I've gotta reach out and feel, something that's real
Before it all crumbles away.
No, nobody hears, nobody hears, nobody hears what I say.

I see blue crystal waters, turning to mud.
And men killing their brothers, while they're crying for love.
Lord we're raping the forests, and we're poisoning the air.
And I call out "won't somebody look what we're doing!", but nob
ody cares.

And I've gotta find someone to talk to,
I've gotta find a safe place to stay.
I've gotta reach out and feel, something that's real
Before it all crumbles away.
No, nobody hears, nobody hears, nobody hears what I say.
