

Blue

Bobby Caldwell

Blue
That's my color
Ever since the day she walked away and said we're through
Not another night out on the town
I don't want to be around
Anyone that maybe we both knew

And red
Red was the color
Right from the start before she broke my heart
And bittered the wine
I appreciate you checking in on me from time to time
But for now it's best to leave me to be blue

I can't spend an evening of pretending to my friends
That I'll be fine, no need to worry...
One more truth I've had to bend
They can see through everything I say and at the end of the night

I'll be blue
For my lover
For the letter that she left for me to find
I appreciate you checking in on me from time to time
Somehow I must try to start anew
So for now it's best to leave me blue

Blue
That's my color
And she left me only pieces of every broken word
Knowing I can't rearrange events as they occurred
Somehow I must try to make it through
Leave me to embrace the color blue
No one knows that color like I do
