

It's All Coming Back to Me Now

Bobby Caldwell

I see the way that you look at each other
Let me give you some good advise
She's big trouble
and

I can tell you brother
It's all coming back to me now

In the beginning everything looks sunny
'fore too long she'll be in control
By the way say goodbye to your money
It's all coming back to me now

Over and over you'll pretend
Everything is fine but then
You're sitting at the bar again
It's all coming back to me now

When you find her in the arms of another
Just remember that's the way she rolls
Black widows bite the heads off their lovers
It's all coming back to me now

Over and over you'll pretend
Everything is fine but then
You're sitting at the bar again
It's all coming back to me now

When you find her in the arms of another
Just remember that's the way she rolls
You will need some time to recover
Take a hint let the truth be told
A black widow bites the head off her lover
It's all coming back to me now
