

Promise

Bobby Caldwell

You promised that you'd never leave me
And you swore your love was true
But I feel like something's pulling you away from me
And baby I think it's serious
So what am I left to do
But remind you of the vows we took that day

Once you make a promise
It's a promise
Not just words that fade away
Baby let's be honest
Once you promise
It's a promise you can never break

Baby when you said forever
I believed in you
Now I wonder why your kiss is not the way it used to be
Baby I'm getting curious
Maybe there's someone new
Don't be thinking you can throw our love away

Once you make a promise
It's a promise
Not just words that fade away
Baby let's be honest
Once you promise
It's a promise you can never break

And baby I think it's serious
So what am I left to do
But remind you of the vows we took that day

Once you make a promise
It's a promise
Not just words that fade away
Baby let's be honest
Once you promise
It's a promise you can never break

Once you make a promise
It's a promise
Not just words that fade away
Baby let's be honest
Once you promise
It's a promise you can never break
