

# Sing Me A Smile

**Bobby Goldsboro**

Excuse me  
Now please, don't think I'm crazy  
But there's something that I'd like you all to do  
Now I know the sky above right now looks hazy  
But with a little help from you we might find the catchy blue

Won't you sing me a smile?  
And I'll smile you a song  
And we'll sing a smile for the world to sing along  
Sing me some sunshine  
It will light the way  
And we'll sing a smile and bring a better day

Everybody sing, sing  
Everybody  
Every man, woman, boy and girl  
Everybody all join hands  
Make a circle of love and stretch it all around the world

Now I know that everyone is not a singer  
But if we all sing together  
Who can tell?  
And the song that we are singing just might linger  
And if it goes from ear to ear  
Soon the whole wide world might hear

Won't you sing me a smile?  
And I'll smile you a song  
And we'll sing a smile for the world to sing along  
Sing me some sunshine  
It will light the way  
And we'll sing a smile and bring a better day

Everybody sing, sing  
Everybody  
Every man, woman, boy and girl  
Everybody all join hands  
Make a circle of love and stretch it all around the world

If you take your neighbour's hand you might discover  
That he's not such a bad guy after all  
And a few kind words to him just might uncover  
It's a lot more fun to live if you know how to forgive

Won't you sing me a smile?  
And I'll smile you a song  
And we'll sing a smile for the world to sing along  
Sing me some sunshine  
It will light the way  
And we'll sing a smile and bring a better day

Everybody sing, sing  
Everybody  
Every man, woman, boy and girl  
Everybody all join hands  
Make a circle of love and stretch it all around the world

Everybody sing, sing  
Everybody  
Every man, woman, boy and girl  
Everybody all join hands  
Make a circle of love and stretch it all around the world

Everybody sing, sing  
Everybody  
Every man, woman, boy and girl  
Everybody all join hands  
Make a circle of love and stretch it all around the world...
