

# Come Home To My Heart

**Bobby Lewis**

If you get lonely out there in that old world  
And you become just a homesick little girl  
Should the life you lead begin to fall apart  
Then come home oh come home to my heart

Then come home to my heart the door is open  
Come on home when the tears begin to fall  
Forget the past and things that might have been  
And come home to my heart just walk right in

If some old mem'ry should start working on your mind  
And you get lonesome for the love you left behind  
If your new world begins to fall apart  
Then come home oh come home to my heart  
Then come home to my heart...  
And come home to my heart just walk right in
