

Loud and Clear

Bobby V

Say what's the problem?
Did you forget that we was talking?
You the only one that I be calling
Had me up and now I'm falling

I can hear it in your footsteps down the hall
I can feel your pain even through these walls
Just a dial tone every time I call
Girl, I read you loud and clear
That'll explain it all

You're not saying one thing
But I hear it loud and clear
You're not saying one thing
But I hear it loud and clear

Let's get it out
It's already loud and clear
Get it out (might as well)
It's already loud and clear

Say what's the problem?
Can't you say something to me?
So why you stallin'?
'Cause all this time is killing me
Killing, killing me

I can hear it in your footsteps down the hall
I can feel your pain even through these walls
Just a dial tone every time I call
Girl, I read you loud and clear
That'll explain it all

You're not saying one thing
But I hear it loud and clear
You're not saying one thing
But I hear it loud and clear

Let's get it out
It's already loud and clear
Get it out (might as well)
It's already loud and clear

You're not saying one thing
But I hear it loud and clear
You're not saying one thing
But I hear it loud and clear
