

The Opposite

Bobby Vee

Everybody knows that the world is round
And what goes up has got to come back down
Well I wonder what everybody would do
If the opposite were only true

If the world were square, and they also found
That what went up never did come down
It would be too good, just too good to be true
'Cause then you would love me, and I wouldn't love you

Ahh you'd be the one to beg for a date
And I'd be the one to show up late
You'd be the one to cry every night
And that would really serve you right

Ahh but the world is round, its so very round
And what goes up has got to come back down
So until the day that the opposites true
There is really nothin' I can do
Except to keep on loving you

Ahh you'd be the one to beg for a date
And I'd be the one to show up late
You'd be the one to cry every night
And that would really serve you right

But the world is round, its so very round
And what goes up has got to come back down
So until the day that the opposites true
There is really nothin' I can do
Ohh except to keep on loving you

Mmmm except to go on loving you
Welllll I guess I'll keep on loving you
