

Say Goodbye

BoDeans

I feel it in the air, its evening and its cooling down
Its changing just bit, change is always coming round
It feels like the sun is falling down in the sky
Ain't no use to hurry, ain't no use to wonder why

You said hello, a time ago
It's been a long long day
It's time time to say, say goodbye
Say goodbye, you'd better get on

There's one foot in the sky
It's fading from an ocean blue
It's such a slow turn
Trading off of me and you
Look so good, I only wish that I could fly
I guess we had a time and there ain't no use to wonder why

You said hello, just a time ago
It's been a long long day
It's time time to say, say goodbye
Say goodbye, you'd better get on
Say goodbye, you'd better get on

Ooh... it's been a long long day

There used to be the day when the clouds were just floating through
There used to be nothing but time between me and you

I remember when the sun was straight up in the sky
Now the stars are in the black and their staring back at you and I

You said hello, just a time ago
It's been a long long day
Its time time to say
You said hello, just a time ago
It's been a long long day
Its time time to say
Say goodbye, you'd better get on
Say goodbye, you'd better get on
