

Tetris

Boldy James

What else?

I got hunnids on tuck from the work shift
I got money off the dust from the merch flipping
Remember hopping off that bus on my first mission
Sold 'em a thousand grams a cut, that's a jerk chicken
Know they had give me up 'fore a reverse sentence
Snitching for a time cut telling firm business
Gritting, tryna catch the rush when the work finish
Had to wear my mask and gloves when I first hit it
Out of sight, out of touch, had to burn bridges
I still got money I ain't touch since I first hid it
Baselining to them clutch, this is first scrimmage
All of the church being cut when he first sent 'em
Center field thugging, bottom of the third inning
In center field, pole clutching, all in church with it
Cuh stole with 50 bucks screaming "Work with him"
Heard he talking down but these sluts spit the worst venom

30 some rounds of our ov', we can cancel Xmas
Flip and turn around all these blocks like we playing Tetris
All our puppy chow into runts, I done made a killing
130,000 in a month, ran into the ceiling
Let's get it

It's lil' bitches on my line when he was messing with him
But I ain't never take her down, this was messaging her
I took her with me through the town but I represent her
She blew my dick a couple times but I never hit her
Be tryna tell these niggas
Prince Fielder up to bat, we some heavy hitters
100 pounds of the ice, you might catch a shiver
If he ain't like that last batch, I got a better litter
What else? These bitches hellla bitter
Teaming up, cliquing with my opps, they was never killers
40 thousand off slips, I Am Legend with it
Big pile of dogshit, I be stepping in it
Playing with that Libra scale, I be level tipping
Big for the 3 Stacks, had to Jezebel it
Touching up that top side, I had to meddle with it
I took a deuce, cut it twice and put a 7 on it

30 some rounds of our ov', we can cancel Xmas
Flip and turn around all these blocks like we playing Tetris
All our puppy chow into runts, I done made a killing
130,000 in a month, ran into the ceiling
Let's get it
