

Cheap Love

BONES UK

War wounds, wild nights, cat fights, scratched eyes
Looking for a little love
Drown it, down it, bury it, burn it
Tryna find a little love
Weekend rock stars, burying icons
Looking for a little love
I don't like to dance without you
Looking for a little love

War wounds, wild nights, tryna find a little light
Cat fights, scratched eyes, looking for a little lie

And you give what you got but it's darker than you thought now
And the birds don't sing anything that's sweet now
And it's dark outside but don't be dark in you

Green eyes, green glass, bottle green reptile
Looking for a little love
Chin up, chin down, chewing gum, heavy town
Looking for a little love
Hugs from thugs and making out with murderers
Tryna find a little love
Well-dressed robots selling us cheap love
Price of a little light

And you give what you got but it's darker than you thought now
And the birds don't sing anything that's sweet now
And it's dark outside but don't be dark in you

Feels like everything that mattered
Doesn't matter anymore
Anything that mattered doesn't matter
Feels like everything that mattered
Doesn't matter anymore
Everything that mattered doesn't matter
Feels like everything that mattered
Doesn't matter anymore
Everything that matters doesn't matter

And you're doing what you can but it's harder than you planned
now
And it's tough to find anywhere soft to land now
And it's dark outside but don't be dark in you
