

Big girls do cry
Big boys do bleed
There's a way to get bloody from a stone rock hard so soft
Tastes like rust
Runs like milk
Camouflage pink
Makes me wink
I'm too drunk to drink
Let's go dancing
I need to move my body, he's a princess, I'm a king, I would do anything
Don't need a fucking ring to be by your side forever
Not together, together

I saw the sun
Been so long when you're chasing lightning
It's all so good
If you want it to be, it can be so good
I want it all, I want it all, I want it all
I saw the sun
Been so long since I've seen the sun

I heard your heart beat in my chest
Of all the things I like I think I like you the best
Get some rest 'cause we're gonna go dancing
Get some rest 'cause we're gonna go dancing
Slide like a zombie in the wild
I'm an old soul and I'm a fucking child
All salt and no margarita
No hope that I'm ever getting sweeter

I'm a vibe sucking Venus
I'm an undiscovered genius
My soul feels wrong underneath my skin
I think I picked the wrong one up when I was skinny dipping

I saw the sun
Been so long when you're chasing lightning
It's all so good
If you want it to be, it can be so good
I want it all, I want it all, I want it all
I saw the sun
Been so long since I've seen the sun

Been so long, been so long
Been so long, been so long

I heard your heart beat in my chest
Of all the things I like I think I like you the best

I saw the sun
Been so long, been so long
It's all so good
If you want it to be, it can be so good
I want it all, I want it all, I want it all
I saw the sun
Been so long since I've seen the sun
