## **Bonfire**

I still remember our love A promise for a life time I still dream about you - won't wake I wanna sleep forever If Heaven is without you Don't wanna step into the light Do you still love me the way I love you Do you still need me like the way 1 do Do you still want me - the way I want you Do you still dream about eternal love Footprints for lovers - skin, deep Scars of true affection Still feet the fire Each Thought's a sigh of my devotion How could 1 ever lose you I wish that I could turn back lime Do you still love me the way I love you Do you still need me like the way 1 do Do you still want me - the way I want you Do you still dream about eternal love When love rules your heart It's Heaven and hell I can tear you apart - who can tell Do you still love me the way I love you Do you still need me like the way 1 do Do you still want me - the way I want you Do you still dream about eternal love
