Fight For Love

remember the winters ... when time it just stood still Making love by the fireside, God it felt so real And I still feel it burning ... when I look into your eyes Time was all we had to waste and I never wondered why I remember the summers ... and the never-ending nights, yeah We drove around forever and ever knowing it was right But sometimes we could see ... into the eye of the hurricane It's love and pain, it's one and the same Every single breath we took was full of emotion No matter what they say, we'll never walk away Chorus: For love, we'll always fight for love No you'll never have to cry, no I'll never say goodbye For love, we'll always fight for our love Like a light into the darkness... I will show you, I will show you how I remember the springtime, we were kids and playing love Growing older and so much bolder, we couldn't get enough We always took for granted ... that everything would turn out right But dreams were not enough this time, this time we had to fight, yeah Every single little time we kissed was more than a promise... That we'll take each other's hand ... and we'll make the final stand Chorus How to find the way, oh oh We're fighting, fighting for love For love, we'll always fight for love, baby No you'll never have to cry - you'll never have to cry No I'll never say goodbye For love, we'll always fight for our love Like a light into the darkness... I will show you, I will show you my love We'll always fight for love No you'll never have to cry, no I'll never say goodbye For love, we'll always fight for our love - we'll stay together Like a light into the darkness... I will show you, I will show you how Fight for our love Ooh oh oh, baby Fight for our love
