Bonfire

Good-bye came - without a warning I never thought - it could hurt me that way You've been like - a new day dawning a snowflake melting - on a sunny day How can I live without you God - I miss your smile **CHORUS** So Good night Amanda Good night - I wish you well I'll remember you whereever you are now I wish you good night - I wish you good night My days were filled - with your sweet laughter I'll always cherish - the your memory And all the nights - we've been together just holding you - so tenderly Still I dream about you God - I miss you so CHORUS It's so hard not to think about you - girl I have built my world around you but somehow it stopped to turn - without you **CHORUS** So Good night Amanda Good night - I wish you well I'll remember you whereever you are now I wish you good night - I wish you good night So Good night Amanda Good night - I wish you well you'll be in my heart until we meet again (until the end of time) I wish you good night - I wish you good night
