

# Ever Lost Your Lover

Bootsy Collins

Yeah

Have you ever lost your lover

You can't hide under cover

Have you ever lost your lover

Don't you know you can recover

So come on and dance with me

Remember those happy days when we laid

In the shade

Drinkin' that electric wine as we danced that night away

Sunshine lit up every night

While your smile was ultrabright

What ever happened into the night

Have you ever lost you lover

You can't hide under cover

Have you ever lost your lover

Don't you know you can recover

Remembering the times when I first laid eyes on you

I was so green around the collar, I didn't know what to do

But you took my hand and you led me out to the dance floor of life

And ever since that day I've done everything alright

My ultimate fantasy is to hold you

Once again

To be more than just your lover

I want to be under you skin

Look into your face and see the love

That's my pleasure

Let's take a ride down memory lane

That's my very treasure

Baby, let's take a ride

Baby, let's take a ride  
That's right, do the wonder  
May I have this dance, baby  
Do the wonder  
Baby do the wonder  
Baby do the freak  
Leave my body weak  
Can you do the slide  
Get on do  
Can you do the shake  
Rub my body ache, baby  
Have you ever lost your lover  
Don't you know you can recover  
Oh yeah baby I'm on the way back  
Checkin' out where the party is at  
Ain't nothing fat but the groove, baby  
Yeah I gotta recoup, regroup, baby  
She's my ultimate fantasy  
Don't you ever think about leavin' me  
Have you ever  
Ever lost your lover  
Have you ever  
Know you can recover  
Have you ever lost your lover
