

Until the End

Booze & Glory

You've been struggling all these years
And you're never gonna win
But you know that you always stay the same
Born to lose and live to sin
And your head is full of dreams
But you learnt the rules, you know how to play the game

For the kids we can't ignore
Empty bottles on the floor
All them wasted years we didn't understand
For our friends who passed away
But the memories won't fade
We are marching on, together till the end

When you feel like a waste of space
And life keeps slapping your face
But when you need me, I will pick up the phone
Don't forget the golden rule
"All for one and one for all"
So remember - you will never walk alone

For the kids we can't ignore
Empty bottles on the floor
All them wasted years we didn't understand
For our friends who passed away
But the memories won't fade
We are marching on, together till the end
[x2]

[Chorus x2]
