

We Don't Wanna Change the World

Booze & Glory

You never wanted be a part of this sick society
You don't expect anything, and all you want to be free
You look at the mirror and don't believe
You have no money but lots of dreams
And you know that nothing's gonna change

I haven't got victorian house and i don't drive shiny cars
All i've got is my way of life and shaved head full of scars
I have no money but lots of friends
They always back me up on raining days
And i know they'll never let me down

We don't wanna change the world,lets leave it as it is
We ain't gonna treat it serious we always take a piss
Shave you head and polish boots its time to start the show
From every part of the world skinheads!- that way we go!

Don't ever care when people say if that is right or wrong
And always try to follow your way,be proud 'cause you're your own god
Look at them pricks who live around
They waste their lifes they're fucking cunts
And you know that nothing's gonna change

You are sure of the choices you've made, you know what's good for you
Your family and good old mates,doesn't matter if there are only a few
But they will never let you down
And they will always back you up
And you know that nothing's gonna change.

We don't wanna change the world,lets leave it as it is
We ain't gonna treat it serious we always take a piss
Shave you head and polish boots its time to start the show
From every part of the world skinheads!- that way we go!
