

Lost & Found

Borgeous

Found you in the dust, we fell in lust
Back then it meant nothin'
But you give me a rush, more than enough
To keep me up in the morning.

And we've made it this far
You're fuel to my car
I feel like I'm rollin'
No need to stop coz we've only just started
And I can't control it.

Always, looking for something (looking for something)
Looking for something
Searching over, and over.
Well there must be
Said there must be something (there must be something)
But we've found nothing
So until then we are the lost and found.

You give me a rush more than enough
To keep me up in the morning
Made it this far...
We are the lost and found...

Don't know what this is, but we found bliss
Somewhere in the madness
I don't wanna give up, let's go the distance
Take me to another planet.

And we've made it this far
You're fuel to my car
I feel like I'm rollin'
No need to stop coz we've only just started
And I can't control it.

Always, looking for something (looking for something)
Looking for something
Searching over, and over.
Well there must be
Said there must be something (there must be something)
But we've found nothing
So until then we are the lost and found.

You give me a rush more than enough
To keep me up in the morning
Made it this far...
We are the lost and f...

Lost and found...
