

# Shadows

**Borgore**

Yeah we done this all before  
Left our hearts out on the floor  
I can hear them shadows knocking at my door  
Seems like they're coming for you and me

A broken record plays along  
What used to be our favourite song  
Even though we know the melody  
It seems the words are gone

There's no more you and me

Yeah we done this all before  
Left our hearts out on the floor  
I can hear them shadows knocking at my door  
Seems like they're coming for you and me

A broken record plays along  
What used to be our favourite song  
Even though we know the melody  
It seems the words are gone

There's no more you and me, and me, and you

Yeah we done this all before  
Left our hearts out on the floor  
I can hear them shadows knocking at my door  
Seems like they're coming for you and me

A broken record plays along  
What used to be our favourite song  
Even though we know the melody  
It seems the words are gone

There's no more you and me, and me, and you
