

In a strange way it's beautiful
If you can understand
In the desert you don't survive
Unless you learn to eat the sand

It's underneath us right

Now the time is up and I howl the need
To a startled moon
See the strength I had come to find
Well it was undeniably a form of rage

It's underneath us right

But it was never gonna be a fair fight

It was a bone crushing silence
I guess it was always inside us
Exposing an emotional violence
The type that takes over despite us

I guess it was always inside us
I see now that it was somehow walking beside us
Exposing an emotional violence
I guess it was

Always inside us
I guess it was always inside us
A silent but emotional violence
The type that takes over despite us

I guess it was always inside us
I see now that it was always inside us
A silent but emotional violence
I guess it was
