

Long Long Way

Boy & Bear

I cant tell what you're thinking
I'm only guessing in the dark
With my hands I make the shape of you

Cos there's nothing to lose but the war
Nowhere to get to from this star port
Distance takes me another day from you
But the cosmic view will suffice for the while

I ended up a long long way out here
Just another wave of restless sound as long as I go
I ended up a long long way
A long long way out here

Now every moment ahead is rushing up on me
And there's nothing to lose any more
Maybe I've become a distant sun
Could you tell which one from down below

I ended up a long long way out here
Just another wave of restless sound as long as I go
I ended up a long long way
A long long way out here

I ended up a long long way out here
And I've been wandering and weightless all on my own
I ended up a long long way
A long long way out here

Now every moment ahead
Is rushing up on me
