

Off My Head

Boy & Bear

It's in the air I breathe
I've considered almost every single angle
But the chemistry
Dictates terms

Now on the contrary
It's not as simple as suggesting is compliant
That's a fantasy
At least in my case

I was flat out of wisdom
You were asking too much of me man
I was long gone by then
Off my head
Off my head

Another memory
Gone missing in the glistening that gave it to you
Piece by piece
In the first place

I guess I must concede
I always thought that it was somewhere in the middle
But the words I needed
Weren't even on the page

It was there for the taking
I was so close to everything
I was long gone by then
Off my head

I was flat out of wisdom
You were asking too much of me man
I was long gone by then
Off my head

It was there for the taking
I'm prepared now for anything
I was long gone my friend
Off my head
Off my head
Off my head
Off my head
Off my head
