

## Suck on Light

Boy & Bear

I didn't even try to stand  
My world was on fire now  
And there was nothing I could do  
There was nothing I could say  
To persuade the wrongs to right themselves  
I was swinging hard now  
Just upon the edge of virtue  
Move back again, move back

I was in a real dire state  
I was in the most awkward of ways  
With my head against the earth  
I tried just to find peace of a mind undone  
A mind undone

And now I'm moving with a quiet ease  
Something inside me is changing  
It's stirring all the life in me, oh baby  
Because there's only so much weight you can bear alright  
When you're walking on ice  
Now I'm doing it all wrong but it feels so right

It's a sober sight  
Your knuckles bared and white  
It's the flicker on the front line from a candle light  
It's the appetite  
You gotta suck on light  
And stand ya ground  
So sue me I had a change of heart  
I used to think that I could justify the waste of time it's only mine  
But I'm yet to find a vivid life without it

Now I'm moving through a lighter breeze  
Something inside me is changing  
It's strange how all the colours bleed, oh baby  
Cos a rolling stone can pick up some pace alright  
When the mountains this high  
Now I'm doing it all wrong but it feels so right

Now I'm moving with a quiet ease  
Something inside me is changing  
It's stirring all the life in me, oh baby  
Now I'm moving through a lighter breeze  
Something inside me is changing  
It's strange how all the colours bleed  
Oh baby

Cos I was in a real dire state  
I was in the most awkward of ways  
And with my head against the earth  
I tried just to find peace  
And I found some  
Hell, I found some

I didn't even try to stand  
My world was on fire now  
And there was nothing I could do

There was nothing I could say

And now I'm moving with a quiet ease  
And something inside me is changing
