

Dancing On Dynamite

Boy In Space

I saw in your eyes
You were begging me to leave
But not letting go

A deer in your headlights
I was counting on a miracle

We were humming along
To the same old songs
I was driving you home
You were too far gone
I was giving it all, you were taking
You were covering up, I was naked

And I know that it's hard to love
We've been shedding our skin
Like a change in the wind
And I know it sucks
But we'll grow through pain
We're a field that was fire struck
We were beautiful
So delusional
Said we'd try until do or die
It was chemical
Inevitable
We were dancing on dynamite

Loves not symmetrical
We were breaking every bone
Trying fit a mold

Buried six feet
Under every memory
With a straw to breathe

Strumming along
To the same old songs
I was driving you home
You were too far gone
I was giving it all, you were taking
You were covering up, I was naked

And I know that it's hard to love
We've been shedding our skin
Like a change in the wind
And I know it sucks
But we'll grow through the pain
We're a field that was fire struck
We were beautiful
So delusional
Said we'd try until do or die
It was chemical
Inevitable
We were dancing on dynamite

And I know that it's hard to love
We've been shedding our skin

Like a change in the wind
And I know it sucks
But we'll grow through the pain
We're a field that was fire struck
We were beautiful
So delusional
Said we'd try until do or die
It was chemical
Inevitable
We were dancing on dynamite
