

# Finally Fine Without You

Boy In Space

I didn't know  
That you were an actress  
I would have taken  
All your classes  
You were the brains  
And I was the acid  
Singing to music  
While we're blasted

It was you and me  
In a broken time machine  
We were high on dreams  
And the things we'd never be

I was going insane  
You were going to college  
Whatever it takes  
That was the promise  
You're running a train  
Yeah I got my problems  
But you're both a fuck up  
And a prophet

Now you're out my way  
I'm running out of things I could say  
And I think about you every day  
But the memories fade  
I'm finally fine without you

The weekend we spent  
In Indianapolis  
Said we'd never be  
Just like our parents  
And you broke on the seams  
On my Jean jacket  
But I didn't care  
Cuz you could have it

It was you and me  
In a broken time machine  
We were high on dreams  
And the things we'd never be

I was going insane  
You were going to college  
Whatever it takes  
That was the promise  
You're running a train  
Yeah I got my problems  
But you're both a fuck up  
And a prophet

Now you're out of my way  
I'm running out of things I could say  
And I think about you every day  
But the memories fade  
I'm finally fine without you

And life's not a race  
I really hope you find your own place  
And I wish someday you'll feel the same  
Cuz I'll be okay  
I'm finally fine without you
