Boy In Space

I think too much
You say what's on your mind
You drink, I drive
Into the hills of ice

Wish I could just forget you
Think of your face I miss you

Working everyday got a 9 to 5
Overdrive
I'm so tired
Call me on my phone try to waste my time
You're so fine
Let it slide
Everybody's very quiet when you walk into the room
And you're out almost every night, always sly
Let it slide

You breathe, I'm trying
So I can stay alive
You feel, I'm numb
You're on the other side

Wish I could just forget you
Think of your face I miss you

Working everyday got a 9 to 5
Overdrive
I'm so tired
Call me on my phone try to waste my time
You're so fine
Let it slide
Everybody's very quiet when you walk into the room
And you're out almost every night, always sly
Let it slide

Wish I could just forget you
Think of your face I miss you

Working everyday got a 9 to 5
Overdrive
I'm so tired
Call me on my phone try to waste my time
You're so fine
Let it slide
Everybody's very quiet when you walk into the room
And you're out almost every night, always sly
Let it slide
