

# I Love This World

Boy Meets Girl

I love this world  
And I know it isn't easy  
'Times its darkness overwhelms me  
Like a starving dying child  
With her father and her mother  
Standing helplessly by, why  
And it's only for us each to say  
We did the best with what we have  
Do the best that we can

I love this world  
Love to make it all right  
I love this world  
Love to offer some advice  
But who am I  
Just an ordinary girl  
That's grown into a woman  
Of the wide, wide world

I love this world  
With its every kind of person  
Take the best ones with the worst ones  
That's just the way it is  
Walking with a lantern  
This fear and compassion  
I will make my way, hey  
And here in my corner  
I do the best with what I have  
Do the best that I can

I love this world  
Love to make it all right  
I love this world  
Love to offer some advice  
But who am I  
Just an ordinary girl  
That's grown into a woman  
Of the wide, wide world

I love this world  
Love to make it all right  
I love this world  
Love to offer some advice  
But who am I  
Just an ordinary girl  
That's grown into a woman  
Of the wide, wide world

You can open a door  
You can shine a light  
But you can't change another  
Or make it all right  
We're creatures of example  
To some degree  
But we're much more creatures of experience  
If you ask me

I love this world  
Love to make it all right  
I love this world  
Love to offer some advice  
But who am I  
Just an ordinary girl  
That's grown into a woman  
Of the wide, wide world

World, world

I love this world  
Love to make it all right, yeah  
I love this world  
Love to offer some advice  
But who am I  
Just an ordinary girl  
That's grown into a woman  
Of the wide, wide world
