

## Doing It Behind The Marching Band

Boyish

Twisting my neck around  
Open up my eyes, there's something out there  
I wanted to be wrong  
Blondes in the band stand  
Toss around their hair, there's no one watching  
Time slows, I should be home

When it's dark there's a part of me that starts to unfold  
I get so cold at night when  
There's something waiting on the outside but I'm right here

Twisting my neck about  
Open up my eyes, an angels watching  
Don't ignore me, I showed up hours ago  
There's a part of me that starts to unfold  
I get so bored at night, well  
I love you but its breaking my heart

Did you think that I'd know better  
If anything that's a promise  
Well did you think that I'd know best  
It's what you wanted, what you wanted

From the start, there's a part of me that shouldn't exist  
Shot through the darkness but I didn't miss  
There's a part of me I couldn't resist  
But I take it all  
I take what's mine, I take it all  
It's what you wanted, what you wanted  
When I take it off  
I take what's mine, I take it all  
It's what you wanted, what you wanted  
When I take it off
