

One Match

BoySetsFire

There's only one way out
And you'll never find it 'til you find it on your own
Rise up to find yourself
Even flames that burned you into ashes long ago

This fight begins as it will end

It's you and me and the gasoline
Igniting our destiny
It's you and me and the gasoline
Just one match away from entropy

We bleed desire
Unending fire rising from the static air
Complete defiance
Annihilation of a life filled from despair

This fight begins as it will end

It's you and me and the gasoline
Igniting our destiny
It's you and me and the gasoline
Just one match away from entropy

With just one match our hearts catch fire
With just one match we burn with pure desire

It's just you and me and the gasoline
Igniting our destiny
It's you and me and the gasoline
Just one match away from entropy

This fight begins as it will end
This fight begins as it will end
