

Burn

BoyWithUke

Spend eternity without you
Safe to say I live in cold
(Burn out)
Won't try to saturate it for you
(Burn out)
Burning out a breath of coal

My mind don't work like it used to
It must have been the poison on the tip of your tongue
I sold my soul for a ceasefire
But they don't wanna let it go

They gon' make me (Burn out)
They gon' make me (Burn out)

It's all in my head, the parity in my system, it's my chest
Ain't no point, can't match this rhythm, burning up fast, can't
catch my breath
Heart so cold, turns all the water into ice, wrapped around my
wrist
Don't lose yourself, don't chase no one
Drop that shit and catch my, catch my, catch my, catch my drift

I can't help myself, all I think I know is fading
Until everything and everyone is everybody else
So don't look down, all you think you are is breaking
It comes and goes like animals within and without
Won't live without you, baby, it's temporary (Burn out)
Won't live without you, baby, it's temporary (Burn out)
I can't help myself, all I think I know is fading
Until everything and everyone is everybody else (Burn out)
So don't look down, all you think you are is breaking
It comes and goes like animals within and without (Burn out)

I loved and I lost
But a life without love is much worse than the cost of what could have been
By the end of it, mm

I won't let it burn out!
I won't let it burn out!
I won't let it burn out!

Mm...
I won't let it burn out

Mm...
I won't let it
