

# Light Up the Night

Boyzone

Before you I was a church  
Without an echo of a prayer  
Before you I wasn't strong  
Without a lighter... held up in the air

Don't know if I ever could thank you  
Near enough for the love since we met  
For every sunrise and sunset

We light up the night  
The spark, in your eyes  
It's more than enough  
To steal the dark from the skies

We light up the night  
We're forever young  
You know two stars shine brighter than one  
We light up the night

Light up, light up the night  
Light up, light up the night  
Light up, light up the night  
Light up, light up

Before you I was a party  
With no glitter on the floor  
Before you I was less calm  
With no one  
Kissin' me out the door

You're a dream I was always dreaming  
Can't believe I'm finally awake  
Holding you til the day break

We light up the night  
The spark, in your eyes  
It's more than enough  
To steal the dark from the skies

We light up the night  
We're forever young  
You know two stars shine brighter than one  
We light up the night

Light up, light up the night  
Light up, light up the night  
Light up, light up the night  
Light up, light up

We light up the night  
The spark, in your eyes  
It's more than enough  
To steal the dark from the skies
