

## Nothing Will Take Your Place

Boz Scaggs

Maybe you've got your mind made up  
Don't know where to start  
Or maybe you hold your painted cup  
Too close to your heart  
What about what you said today  
That was all you ever had to say  
No one else ever made it sound just that way  
Take your places  
Show your faces  
Days break with out takes and accidents  
Your baby cries your lovers lie  
You must make sense  
But all you ever had to do  
Is do what you have to do  
And you're the only one who knows  
Just exactly what that is  
Take your places  
Show your faces  
Without you dear there's nothing here  
It's all a mystery  
So stay right there and take good care  
Just for me  
Nothing will ever take your place  
Nothing will ever take your place  
Thoughts and day dreams fill the air  
They fly around like birds  
And I can sing you melodies  
And they just sound like words  
Wanna know what they say  
You overhear it everyday  
You're the one we've been hearing all about  
Take your places  
Show your faces  
Without you dear there's nothing here  
It's all a mystery  
So stay right there and take good care  
Just for me  
Nothing will ever take your place  
Nothing will ever take your place
