

## The Leading

### Brainstorm

Betray your friends and regret your life  
For all the words you said  
You pull my string and cut the line  
Around my head  
You fingertips will burn my soul  
And reflect my life, I'll raise my hands against you  
All my longing to survive

I'll go as far as you want me to now and forever  
As the smoke pours down on you

Leading on me, when emotions all have left my  
... leading voices, and why are we here  
As I'm leading a dream with all the memories in my mind  
... leading voices, so why are we here?

Another faith I'll find me in  
After facing all my fears  
Your pride turns into a deadly sin  
As the dream appears

Religions I used to know now and forever  
Things we shared so long ago  
Now here I am, I won't be found  
Cause I got no religion  
Don't turn your face down to the ground  
Whatever believe, as now we are free  
Somehow slow recovery  
Release yourself... for immortality
