

This is what I've discovered

Oh I used to know my ethic
Now I'm bouncing off the walls of my intent
And I want everyone to know me
But I'm looking past required interaction

'Cause I've been looking down your path like a mental quickscope
Look in your direction realize that you wan' be friends though
Talking 'bout release dates, dominate my end goals
Yeah I know I can do it just gotta put in elbow

Bad talk, good luck (Ay)
I'm lacking my funds (Ay)
Got no face on my passport
Got no haze in my lungs (Ay)
I just sit there and flashback
Fall backwards, I backtrack
Don't call me stupid, I'm dumb
Don't call me Cupid, 'cause uh
Brakence made a brand new sound now, and if you hear it you won't wanna fuck
with me
Worst handshake in the world, but when I show up they still wanna be stuck t
o me
'Cause I don't really care about the flux
Just your drive and your passion to do something that you love

Act up, yeah I got it from the WiFi
Everywhere I go want to see her in the nighttime
Keep me up late, got me doing all the right crime
And running my ego right off a mattress
Think your funny but really you stuck in past tense
I can get a little religious no I ain't static
Now I got a skill but how am I gonna cash this
You can keep it coming 'cause I'm gonna run it back

'Cause I've been looking down your path like a mental quickscope
Look in your direction realize that you wan' be friends though
Talking 'bout release dates, dominate my end goals
Yeah I know I can do it just gotta put in elbow

I'm tired of these motherfuckers in my headphones
Loaded up with questions 'bout my mental state, Velcro
Booked weeks, like I really wanna keep up this show
Fuck everything but my DAW and my SO

And now I find myself enthralled
There's a reason I forgot what I was thinking
And I was trained to be responsible
But I can't do it with this screen in my lap

So I'll just be like
Get outta my Insta feed
Why you wanna be a friend of me?
I'm a nerd, I don't care about one night stands or drinking on the Hennessy
'Cause I'm on Earth to fight entropy
But I'm using chaos as my energy

Everywhere I need to go
Add a little more just so I can feel my self
Get outta my Insta feed
