

I got you, I got you
I got you, I got you
(One, two, three, and)

They can keep the key
What might have been lost doesn't bother me
The wolves or sheep
With this blood on my hands
I'm making amends
I'll move slowly (Yeah)
And I've worried that you're worried
'Cause I wanted
To be like my mama
And get stronger
But you can never put a label on me
We don't got no ID
And if everyone had their reply
I'm on read

I got you, I got you
I got you, I got you, I got you
I got you, I got you, I got you
(No)

I get burning eyes
Whenever I take my own advice
Is it really mine?
I want help, don't need luck
And I don't give a fuck if you want me to (Mmm)
I've learned it's gotta come from inside me
I don't need to rhyme
And I don't need no IV
I've been here all night
I can't think to forget for you baby
I'll carry all of you on me
Ooh, we'll be fine

Now, I got you, I got you, I got you
And I got you, and I got you
I got you, I got you, I got you, ohh, no

When you hold my hand
I think we should make more plans
But you going out in San
What's the point of being friends
But I'll never leave your IG hole
And if I fall out in that cold
I trust that you'll get over that
You wanted me to reaccept my end

I got you, I got you, I got you
I got you, I got you, I got you
I got you, I got you
