

Ah

But baby, you don't understand
I don't want no other man
I spent all my serotonin on you
I did everything I can
Just to fuck it up again
I spent all my serotonin on you, ooh

Just say whatever you wanna say
A breakdown's wrapped around my face
Because I'm holdin' in the truth
And if I bite my tongue then maybe I won't cry
Had to hollow my lungs and let out a bad lie
I became such a fool, a husk, hallucinating

You don't understand
I don't want no other man
I spent all my serotonin on you
I did everything I can
And I fucked it up again
I spent all my serotonin on you, ooh

A hypochondriac (Stay up 'til five, pass out on the floor)
I think of you blood pressure spikes (I think too much, why can
't I let you go?)
I'll have a heart attack (I'm on your side, fuck takin' offense
)
The things I do to see you smile (But why do you act like you w
ere never my friend?)
You don't even have to call me back (You can't forgive and I wo
n't forget)
I just want some closure, little peace of mind (My whole Goddam
n life, I was playin' pretend)
You don't even have to give me that (And now I can't get a word
in)
Just sit down, listen to me because

You don't understand
I don't want no other man
I spent all my serotonin on you
I did everything I can
And I fucked it up again
I spent all my serotonin on you
