

I backtrack on normalizing phrases
It's more important when the green is gone she feels the same way
I like to think it means exactly what it is
But it's probably a social kind of thing

I don't think I've ever known one higher
If you drop hints I'm okay with that
Is this another distraction?
I've had more than one before

Is it my fault that I'm calling it beforehand?
'Cause you keep accepting his presence and I don't know why I forget every time
I don't want to mistake this for the LED lying and
I know enough not to hypothesize but I can't tell

I don't think I have a chance to read you
While you sit and get your sight
And hearing overloaded
I want all five, but this is my crutch
