

Close

Branan Murphy

I never saw it coming
A phone call I won't forget
And most days I wonder if I can pass this test
There's no way around it
We can only go through
Even though that's the last thing that I want to do

What we need right now
More than anything
Is to know
Just how close (how close you are)
There's nothing to worry
I got everything
'Cause I know
Just how close
How close you are

I know you can change things
But even if you don't
I'd trade the easy road
Just to know you're close
I want to see your power
Please, Lord come through
But only if the healing means I get more of you

What we need right now
More than anything
Is to know
Just how close (how close you are)
There's nothing to worry
I got everything
'Cause I know
Just how close
How close you are

All the money in the world
You can take it all away
Empty pockets but my heart is full of faith
'Cause no matter what I'm walking through
I'm walking in your grace
I got your peace
I know they said cancer
I know they said wait
I know it was divorce
But I know you can relate
And that's the thing I love that makes your presence so great
You understand 'cause you've been there

What we need right now
More than anything
Is to know
Just how close you are
What we need right now
More than anything
Is to know
Just how close (how close you are)
There's nothing to worry

I got everything
'Cause I know
Just how close
How close you are
