

Something About You

Brandon Jenner

My memory is clear
A vision unchanged
Time sort of slipped through the cracks
On the first day I saw you
And I never forgot you
As the years went by
I would hear your name
Silence would fall so I knew
There was something about you
There's something about you
When we finally met
I looked in your eyes
The room opened up to make space
For a message to come through
That I already loved you

Take my hand
Whisper to me tell me you understand
My true love
Yes, we found the feeling
The whole world is still dreaming of

With our bodies entwined
The moon up above
I feel your warm breath in my bones
I just have to tell you
That I can't live without you
Now I'm down on one knee
My heart on the line
Let's say our vows
So that everyone knows how I love you
'Cause there's something about you
The strength that it took
The pain you went through
You gave us our children
And they are so lucky to have you
'Cause there's nobody like you

All I've known
Was less than forever till you brought me home
My true love
Yes, we found the magic
The whole world is still dreaming of

While these chords will grow old
The pages will fade
One thing will always remain
That's how I feel about you
'Cause darling I love you
And I can't live without you
There's just something about you
